GENERAL NOTES

The statistics presented in this publication are compiled from information submitted to the Department of Hospitals and Medical Care by each general hospital, auxiliary hospital and nursing home.

Hospital operation and financial data, as shown in Tables 1 to 40, are derived from the Annual Return of Health Care Facilities - Hospitals - Parts One and Two for the year ended March 31, 1980. The data include all amendments and corrections submitted to the Department by individual hospitals on or before May 14, 1982. The financial data presented in Tables 31 to 40 are compiled and reported on an accrual basis. Tables 31, 32, 36 and 37 contain unaudited expenditure data, while Tables 33 to 35 and 38 to 40 contain audited data for operating income and operating expense as certified and reported by the external auditor of the hospital. It should be noted that the data for operating surplus or deficit of hospitals in Tables 35 and 40 do not necessarily represent the final surplus or deficit for the year, as determined and approved by the Department, due to adjustments to total operating income and expenditure made subsequent to the receipt of the audited statements. When interpreting the above data, reference should be made to the Glossary which contains selected definitions of terms used in the Annual Return.

Auxiliary Hospital patient data in Tables 41 to 50 are compiled from inpatient admission and separation records for the year ended March 31, 1980. There are differences between the admission, separation, and patient still-in data reported by certain hospitals using this data source and the data shown in Table 24 which are dervied from the 1979-80 Annual Returns.

Nursing home operation and patient data, as shown in Tables 51 to 61, are derived mainly from nursing home claims payment statistics for the fiscal year 1979-80. The exceptions to this are columns 1 to 3 of Table 51, and Tables 52 and 53 which are obtained from the Alberta Nursing Home Plan, Monthly Information Report for the year ended March 31, 1980.

The statistical tables which follow provide detailed information on the operation and utilization of hospitals and nursing homes. In these tables, the facilities have been arranged in ascending order on approved bed complement within facility group. An alphabetical listing for each type of facility can be found at the end of the supplement.

Note: All rates shown in the following tables have been rounded to one decimal place.
